Freedom

ARROW™ WIRELESS CONNECTIVITY

Arrow™ is our zero compression method of distributing wireless and delivers performance similar to our more expensive wireless systems quickly, reliably and without the thin, dried out sound most wireless systems deliver. In part, this is achieved by eliminating the often very slow delivery methods offered by off-the-shelf Bluetooth and wi-fi based systems. Arrow represents something of a cost breakthrough as it uses LSI (large scale integrated circuit chips) technology to lower the cost of our system by about 30% while preserving almost all the performance.

This freedom permits ultra-high performance without the cumbersome tether of a cable, allowing careful placement without being limited by the length of a wire and can lead to a better sounding, less cluttered experience. Giving you the ability to place subs in distant corners, along glass walls, or on hardwood floors where a cable would otherwise destroy the effect

A Functionally Perfect Accessory for your REL Subwoofer

I purchased a REL T/9X to go with our B&W 703 floor speakers. The sound was beautiful, but I felt like I had to choose whether to place the REL in close proximity to the speakers or run aesthetically unappealing wiring around the periphery of the room. And then I discovered the Arrow Wireless.

This product is functionally perfect. It...Read More

Arrow wireless

It was very simple and quick (under a couple of minutes) to hook up. It connected immediately. It seems to be a very well made and thoughtfully designed wireless.

Works as Advertised!

The connections was simple and straight forward. The signal accuracy is excellent.

Flawless

Absolutly flawless..

It just worked.. no complications, no "issues" with connectivity.
And, most importantly, no degradation of quality signal and performance to my T/i5 Sub.

Cut the cord with the Arrow Wireless!

Love the ability to place the REL anywhere in the room without having to think about how to get the signals (both high-level and LFE) to the subwoofer! Easy installation. Highly recommended.
