SUGGESTED RETAIL: \$1,499.00

HT/1003MKII (aka The Hammer) Insane Performance at its Size and Price

Buy an HT/1003 MKII if you either don't have the space or don't require the extra output of our larger models. It's that simple. More compact, just as beautiful, it delivers identical build quality to its siblings. It's style makes it an ideal partner in HT/3D REL theatre setups with Serie T/x.

All-new 300W Class D amplifier offers greater headroom and powers a new CarbonGlas™ 10" (250mm) driver. This combination delivers devastating output, playing TWICE as loud as the original. At this price, this performance is unheard of. The icing on the cake is that, like all the new HT's, it responds beautifully when playing music, and HT-Air delivers state of the art (optional) wireless.

Specifications

TYPE	Closed box, front-firing driver
ACTIVE DRIVER SIZE & MATERIAL	10 in. (250mm) long-throw, CarbonGlas™ cone structure, inverted carbon fibre centre cap, steel chassis
PASSIVE RADIATOR SIZE & MATERIAL	NA

When Your Heart Says HT/1205

BUT YOUR WALLET OR YOUR ROOM SAYS NO

Perhaps the most dramatic update in the entire HT range is delivered by the remarkable HT/1003 MKII. In theatre, nothing impresses like raw output, even if you don't use all of it. HT/1003 MKII's increase in usable headroom confers an ease to the sound that lesser designs can't compete with. Here, we realize a full 10 dB higher output (that's twice as loud) over its forbear. As with its larger brothers, HT/1003 MKII receives the full suite of MKII upgrades. First, a higher secondary filter allows energy to extend further up the sonic spectrum means explosions are more savage than ever. Next, an all-analogue PerfectFilter™ lifts and extends the deepest bass. Additionally, an analogue subsonic filter filters out the signals that can lead to damage below 20Hz. All this is packaged in the same sexy, serious look that blends perfectly with our Serie T/x and S for use in HT-3D systems. Also, improvements to driver, amplifier, and filters means this latest version is now a seriously musical sub.

Fantastic !

First of all I would like to thank you for the quality of your product ! I am a sound technician and I can say the sound that delivers the REL 1003 is stunning ! Very low, very precise, hyper fast. It's very discrete also. I like the fact that you don't "hear" it. The quality and the price are amazing.
By the way, I wanted to tell you th...Read More (<https://yotpo.com/go/nPeJXjNq>)

Amazing sub. Amazing value.

Beware of preconceived notions. My view of Rel was that is was an Elite brand that did in fact make amazing subs, but that you also paid a premium for the name. Well, I was right about the former but wrong about the latter. The value this sub represents is simply astonishing. My Home Theater listening room is 20L x 13W x 8H. Half of one side of th...Read More (<https://yotpo.com/go/nPeJXjNq>)

A little more depth

I was using a T5/i in my bedroom with a pair of powered bookshelf speakers. I decided to replace the T5/i with the HT 1003 MkII for a little more depth. It definitely digs deeper, with significantly more output than the T5/i can push. Not that the T5/i is a slouch when used in a small room. I was wanting to upgrade my audio setup at my computer des...Read More (<https://yotpo.com/go/nPeJXjNq>)

This little guy is amazing

I have a 5.1 system that consists of Polk audio rt55i, r35i, and cs400i speakers. I was never happy with the Polk audio subwoofer that I had paired them with. The build quality of the HT1003 is superb. It Sounded amazing right out of the box, and once broken in it has done wonders to my system. Not just the thunderous, very low, distortion free b...Read More (<https://yotpo.com/go/nPeJXjNq>)
