

T/7x

 Wireless

SUGGESTED RETAIL: \$2,099.00

T/7x is the perfect answer for the real world. It's compact enough (and beautiful enough) to end arguments before they begin; while powerful enough to easily answer most needs and balanced enough to blend beautifully with many of the quality speakers out there and still flexible enough to work in specialty applications.

Specifications

TYPE	Front-firing active driver, down-firing passive
ACTIVE DRIVER SIZE & MATERIAL	8 in. (200mm) long-throw, FibreAlloy™ cone, inverted alloy centre cap, steel chassis

Filtered for Purity

THE PRACTICALLY PERFECT REL

REL's legendary High Level Input connection and fast filters are a significant chapter in the REL story. Connecting via the speaker outputs of your amplifier without drawing any power from it may seem like magic, but the real magic lies in the way the sound takes on a natural character and blends seamlessly with your speakers. Unique tuning and special limiters means the T/7x sounds fresher, faster and more dynamic than before.

T/7x is, without reservation, one of the most-balanced RELs of all time. In order to achieve perfect balance, a sub must weigh speed against heft, while ensuring true extension-depth-and do so in a physically harmonious package. T/7x manages to make it all seem easy. Quick and delicate for a perfect blend, it can pound out exceptionally deep, tuneful bass that belies its size and plays louder than most will ever require.

Amazing company with stellar sound

REL is bar none the most responsive, helpful audio company I have ever dealt with. I started with a pair of the T/ 7X model and have moved up to the S/812s. Obviously the 812s are amazing but I have also received

Transformative

I recently purchased a T7X for a secondary system in my moderately sized master bedroom. I've been using stand mounted 600 series B&W's for years. A couple of years ago I bought a small B&W subwoofer & there was certainly some improvement but again, this is a secondary system. I've never done any real critical listening to the system b...Read More

Great addition(s) !!!

We recently acquired a T7x to complement an older system running Kef iQ9 towers driven by a NAD C720BEE receiver (all ca. 2005). This system is in one of 2 listening rooms, connected via our open floor plan. The other, smaller room has a pair of iQ3 bookshelf speakers on stands (same line, same era), complemented by a T5x, all driven by the same r...Read More

The Third Time is the Charm!

The T/7x is my third subwoofer and my first REL. I feel like I'm hearing my music as it should sound for the very first time. Thanks REL, I couldn't be any happier with my purchase!

Musical and beautiful! Patience pays off

I read the reviews. I read the instructions. I watched the videos. So I was prepared. But then I was also in the midst of trying out different speaker wire and interconnects. This added aspect threw a bit of a wrench in the wheel. My system: Technics SL1500 with a VM95ML, Micro Seiki copper platter mat, Fisher 400 tuner, ProJect DS2 Tube Box phono...Read More

REVIEWS + AWARDS

“The speed of the Serie T/7x is its outstanding feature. Few do bass depth and bass speed like this subwoofer at anything like the same price, and for that alone it deserves very high praise because that means the REL sub can keep up with fast musical transients played through equally fast and reactive loudspeakers.” Read **More +**

REL

What the new REL /x s system, in addition to higher level of definiti frequencies, as well as entire frequency spect really experience what do is to shut it off. The your system with it dis That’s truly all it takes
